

Driven by data. Powered by impact.

Now you can quickly and easily see how effective your philanthropic efforts are thanks to CyberGrants Insights. This deep analytics solution lets you organize, optimize, adapt, and enable giving programs faster than ever before with a hands-on approach to understanding and exploring your data. And it enables real-time decision making as well as rapid response time whenever emerging needs arise.

- Modern reporting framework
- Secure robust data access
- Capability to leverage external data sets
- ML/AI-ready data structure

Reduce Your Administrative Burden

Shorten the time spent on report configuration and manual manipulation with at-a-glance monitoring of throughput by status, region, focus area, dollar amount threshold and more.

Take Control of Compliance

Measure and track compliance and funding metrics (i.e., equitable funding) across all of your programs including grants, employee giving, and volunteerism — all in one place.

Accelerate Your Decision Making

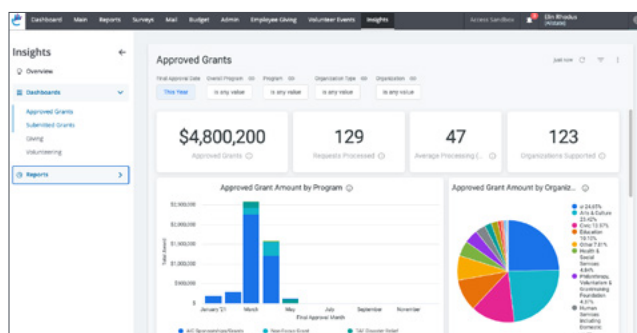

Uncover immediate insights to support real-time decision-making with accurate data at your fingertips.

Optimize and Adapt Your Programs

Take a data-driven approach to strategically adapt and optimize your programs by combining traditional CSR data with web and support analytics.

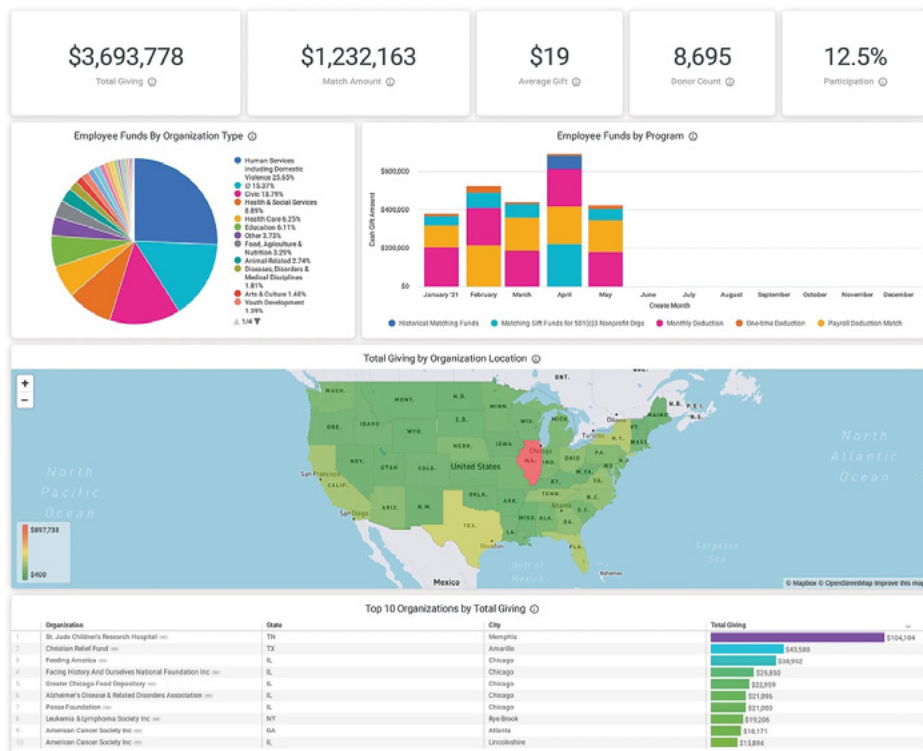

Enhance Your Data

Utilize census and demographic data to align matching gift and grant program spend with strategic initiatives, identify emerging trends, and identify deviations quickly for immediate action.

Measure and Share Your Impact

Distribute high-quality visualizations of your data story with greater precision and dimension for better collaboration with individual and departmental stakeholders. Share a true view of how your funding is making an impact at local and global levels.

Utilize Customized Dashboards

Access vital data at a glance, formatted in standard reports such as Grants Cycle Timelines and Performance, Payment Processing, Budgeting Tracking, Capacity Planning, Internal User, Nonprofit Eligibility, and In-kind/Product for time-saving convenience, efficiency, and reliability.

Explore More

Evaluate your program performance in real-time with informational reports based upon predefined questions. And leverage interactive data visualizations that allow you to drill down into to data so you can develop new strategies and insights.
