Is your grantmaking a fractured process?
Fix your medical grantmaking.

Right now.
Isn’t it time to unite all your medical affairs grants?

Medical affairs grantmaking processes have typically evolved ad hoc, making them complex and inconsistent. When you have different types of grants, multinational borders and business units, regulatory differences and siloed sources of information, running afoul of compliance is almost guaranteed.

All your granting types

Now, you can support all of your grant activity with a single software solution, including:

- Independent Medical Education
- Investigator Initiated Research, Studies & Trials
- Expanded Access Programs
- Patient Advocacy
- Fellowships & Sponsorships
- Charitable Contributions

Proven software solution for some of the world’s largest life sciences companies.

Many of world’s largest life sciences companies have implemented CyberGrants for Life Sciences. Including Pfizer, AstraZeneca, Novartis and Merck. They can now manage risk, and gain visibility across the totality of their medical affairs grantmaking.

CyberGrants for Life Sciences simplifies the complexities. And brings your regulatory risk under control.
Support your workflows.

Across all types of grants.

Across borders and business units.

Across the board.

Optimize patient outcomes by bringing agility to your grantmaking.

Now you can have total visibility into exactly where your dollars are going, process approvals quickly while adhering to regulations, and direct your dollars to where they will do the most good.

Automate any workflow.

The CyberGrants workflow engine handles all types of grants. It accommodates a myriad of geographies, languages, currencies, clinical areas and regulatory requirements, as well as local differences in staffing levels and processes. The engine defines the steps and the people or roles involved, enforces permissions, and executes the rules required for each step in the process.

CyberGrants for Life Sciences standardizes processes where possible. Supports the differences where necessary. And by integrating with your AP systems, automates disbursements while serving as the system of record for all payments related to medical affairs grants.
True global transparency reporting. At your fingertips.

Who wants the risks associated with inconsistent global reporting? With CyberGrants, you get the perfect combination: a process that is predominantly the same in every country AND the flexibility to address country-specific requirements. And because all grant types within all countries feed a common and unified data warehouse, you get a single source of the truth for reporting outcomes, budget reconciliation, and study milestone updates.
Don’t risk regulatory non-compliance.

- Fund the medical education programs you want
- Know where grants are going and what they’re used for
- See where your continuing education money is going
- Identify which doctors your money or in-kind drug samples are going
The best companies on earth.

Join the growing ranks of companies across every industry who have brought agility to their grantmaking. The CyberGrants roster of blue-chip companies includes some of the largest life sciences organizations in the world, as well as more than half of the Fortune 100 companies.

$6 billion in donations. 650,000 non-profits. 150 countries.

CyberGrants for Life Sciences is proven to automate grant activity across borders, at massive scale. We’ve been doing the same thing for more than two decades for corporate foundations. Our software is used in more than 150 counties, supporting a dozen different languages.
Schedule your complimentary Global Benchmarking Session for Grants Management.

Gain the benefit of our experience working with other global life-sciences organizations. Our experts will:

• Examine your global grants management process
• Assess your vulnerabilities and opportunities
• Show you where you stand in relation to your peers
• Give you thorough step-by-step recommendations for streamlining your grant making across regions, while still accommodating for country-specific requirements
